

GK Financing's Unique Package

Our experience in the installation of Gamma Knife technology is unrivaled. GKF's "fee-per-use" concept of no minimum volumes or fixed monthly payments means your Gamma Knife center can actually pay for itself. Our unique financial package also protects your hospital by transferring the risk of technological obsolescence to GKF.

We're with you every step of the way from site selection to operation—with an expertise acquired through the development of more Gamma Knife centers than anyone. We even work with third-party payors and help you professionally market your Gamma Knife center. All you have to do is treat patients.

services

The ease of providing

services

There's no red tape on our package.

Non-invasive Gamma Knife radiosurgery has proven highly effective in the treatment of:

- Primary Malignant Brain Tumors
- Brain Metastases
- Primary Benign Brain Tumors
- Vascular Malformations
- Trigeminal Neuralgia

The Leksell Gamma Knife®

A Proven Radiosurgical Alternative

With more than 250,000 successful treatments worldwide, the Gamma Knife is the radiosurgical leader in the non-invasive treatment of small-to-medium sized intracranial lesions. Precisely focusing 201 beams of cobalt-60 radiation to destroy targeted brain lesions, the Gamma Knife leaves healthy tissue unharmed. Since the Gamma Knife is non-invasive, morbidity and complications are reduced compared to conventional neurosurgery. Gamma Knife patients usually leave the hospital that day or after an overnight stay and resume pre-surgical activities in a matter of days.

GK Financing can help your hospital join a select number of medical facilities offering this proven treatment alternative with a minimal investment. Our comprehensive package eliminates fixed monthly payments, along with the difficult task of acquiring the \$4 to \$5 million of capital to purchase and install the equipment. And there is no need to divert funds from other hospital programs. Our package even keeps this valuable service off your balance sheet. To find out how we'll work with you from concept through completion, call Ernest A. Bates, M.D. at 415.788.5300.

solutions

GKF: Much More Than A Financing Source

Why is GK Financing the leading Gamma Knife developer in the United States? Because we know what works.

Our innovative "package" approach offers you unmatched flexibility and benefits from start-up through operation. With years of experience in developing Gamma Knife centers, we have a documented, unparalleled expertise that we apply to each ensuing start-up.

In short, our track record can help make yours even more successful.

GKF: Minimal Outlay, Minimal Risk

We know how difficult it can be to gain the approvals necessary to raise capital in today's hospital environment. It's a truly arduous process that can create lengthy, unnecessary delays in providing the services your patients require.

That's why our unconventional "fee-per-use" financing concept has proved to be the ideal solution for medical centers across the country. We also offer hospitals revenue sharing and turn-key financing arrangements.

With GK Financing, there are no fixed monthly payments, and no minimum patient volumes. You pay only when you treat a patient, creating a true "win-win" situation for all concerned.

GKF: Ongoing Operational Assistance

We're there at the start, assisting with site selection. And we'll be with you through start-up and beyond, sharing our unparalleled experience in maximizing the performance of Gamma Knife centers.

That experience includes working with third-party payors, and helping you with reimbursement and coding issues. We'll help develop a marketing plan tailored to your specific service area, and can even provide needed funds to help implement your marketing efforts.

GKF: Packaging the 'Gold Standard' of Radiosurgery

Our record of developing successful Gamma Knife centers around the world is unrivaled. We enhance that experience by injecting excellence into everything we do, with a goal of ensuring an efficient, cost-effective center for your hospital.
